

## Audioflex® mineral wool

**Description:** Non-combustible sound and heat insulation made of inorganic mineral wool. The material is made of glass fibers and has low weight and high mechanical resistance. Due to the use of long fibers, dust accumulates only in small quantities.

**Application:** If, in addition to sound insulation, high temperature resistance is required or the material does not have to be flammable.

### Technical specification

Thickness	30, 60, 80	mm
Dimensions	max. 1400 x 1200	mm
Density	~ 25	kg/m <sup>3</sup>
Fire class (DIN 4102)	A1	
Temperature resistance	up to ~ 200	°C
Tensile strenght		kPa
Elongation		%
Copmression hardness		kPa
Thermal conductivity	~ 0,033	W/mK
Soundproofing	Af >=5
